

Custom Project Supply from Foshan, China

Windows, doors, sunrooms and export project support for builders, contractors, importers and private home projects.

15 Years

R&D and customization experience

12,000 sqm

Monthly factory capacity

Foshan

Factory project support

WHO WE ARE

A project supply partner, not just a catalog.

YULUX supports overseas aluminum window, door and sunroom projects from early configuration to export preparation. We help turn drawings, opening schedules, climate requirements, glass choices, finishes, hardware and packing needs into a clearer product plan.

Project Support

- Engineering review
- Specification coordination
- Batch QC
- Export packing support

Built For

- Architects
- Contractors
- Importers
- Developers
- Private home projects

PRODUCT SYSTEMS

Aluminum windows and doors across project types.

Casement Windows

Classic hinged window systems for villas, homes and commercial

Tilt & Turn Windows

Flexible ventilation and cleaning access for residential and

Sliding Windows

Space-saving aluminum systems for apartments, balconies

Sliding Doors

Large opening solutions for patios, living rooms and

Folding Doors

Wide opening systems for indoor-outdoor transition and

Smart Lift Windows

Motorized vertical opening options for counters, balconies

Aluminum-Wood Ecological Doors

Decorative entrance and interior door options with project

Sunrooms

Aluminum and glass enclosure solutions for outdoor living and

WINDOW SYSTEMS

Window systems for ventilation, views and project performance.

Casement Windows	Hinged opening for villas, homes and project rooms; good for ventilation and clean outward views.
Tilt & Turn Windows	Dual-mode ventilation and inward access for residential and apartment applications.
Sliding Windows	Space-saving opening for balconies, apartments, kitchens and renovation projects.
Smart Lift Windows	Motorized vertical window option for counters, terraces and modern lifestyle spaces.

Final series, glass, color, drainage and hardware must be confirmed by selected product system and project documents.

DOOR SYSTEMS

Large openings for patios, villas, hospitality and project entrances.

Sliding Doors	Large glass openings for patios, living rooms, balconies and project entrances.
Folding Doors	Wide opening systems for indoor-outdoor transition, villas and hospitality spaces.
Lift / heavy-duty options	Project-specific choices can be discussed by opening size, wind load and hardware requirement.
Screens and accessories	Flyscreen, handle, lock, threshold and drainage details are confirmed before production.

Door panel size, track design and glass make-up should be reviewed before quoting and production.

SPECIALTY

Beyond standard windows: sunrooms, ecological doors and project options.

Custom scope

- Aluminum glass sunrooms
- Aluminum-wood ecological doors
- Project color and finish review
- Glass, hardware and packing coordination

Specialty products should be confirmed by project drawings, target climate, structural requirements and installation responsibility.

CONFIGURATION

Every project needs the right system, not a generic window.

Profile system

Series and wall thickness are selected by product type, size and project requirement.

Glass build-up

Single, double or performance glass options can be coordinated by project need.

Hardware

Locks, hinges, rollers, winders and motorized options depend on opening type.

Finish

Powder coating, wood-grain and project color references can be reviewed before order.

Screens and accessories

Flyscreen, drainage, sill and decorative options are confirmed with drawings.

Export preparation

Protective packing, crate planning and loading coordination for overseas projects.

Technical values and compliance claims should be confirmed by selected series, destination market and project documents.

FACTORY SUPPORT

From drawings to packed goods.

- 1 **Drawing and opening schedule review**
- 2 **System, glass, finish and hardware coordination**
- 3 **Production progress and batch QC photo support**
- 4 **Packing review for export handling**
- 5 **Container loading coordination when required**

15 Years

R&D experience

12,000 sqm

Monthly capacity

EXPORT READY

Prepared for overseas projects, not just local delivery.

01 Packing review

Protective film, corner protection, crates or frames by product and shipment condition.

02 Loading coordination

Container loading can be coordinated when required by order scope.

03 Project documents

Packing photos, production updates and basic export information can support customer review.

04 Risk control

Glass, large panels and hardware details should be checked before final confirmation.

Packing method, protection level and loading details should be confirmed by product type, shipment route and order scope.

PROJECT SCENARIOS

Suitable systems for villas, hotels, towers and renovations.

Private villas

Residential apartments

Coastal homes

Renovation and balcony upgrade

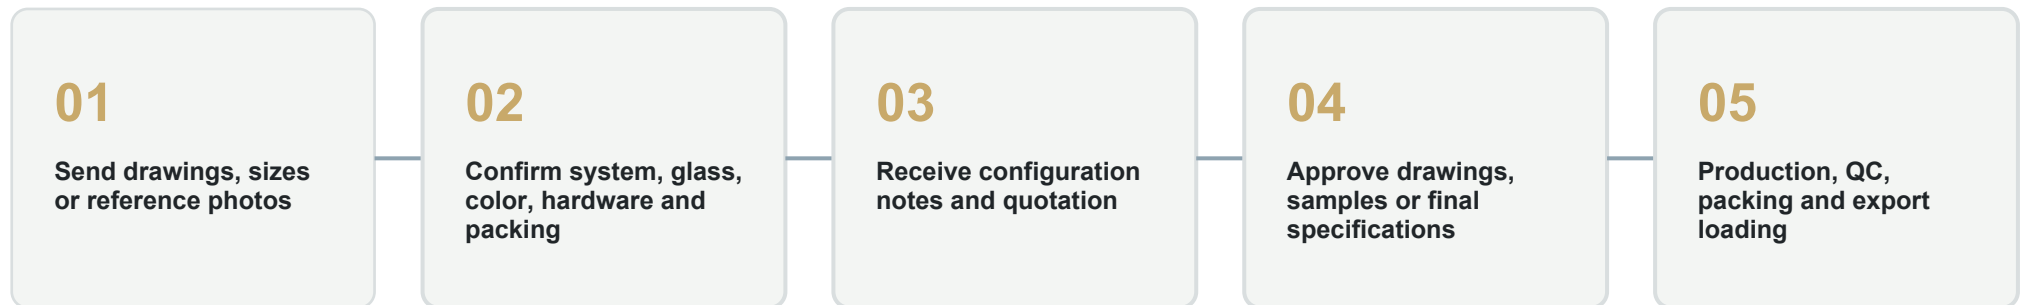

Hotels and resorts

These are project reference scenarios. Specific project names, certifications and performance claims should only be used after confirmation.

WORKFLOW

A clear path from inquiry to production.

WHY YULUX

Project-based customization for overseas window and door supply.

- Aluminum windows, doors and sunrooms across common project applications
- Foshan manufacturing base with export project coordination
- English communication for drawings, requirements and quotation review
- Packing and loading support for international delivery
- Suitable for builders, contractors, importers and private home projects

SNAPSHOT

Example: sliding and folding opening solutions.

Opening types	Sliding doors, folding doors and related window systems
Common project uses	Patio openings, villas, apartments, hospitality areas and renovations
Configuration	Profile, glass, hardware, screen and finish selected by project
Packing	Export packing support available for overseas projects
Confirmation	Final dimensions, handing, drainage and compliance depend on project documents

This page is a capability snapshot, not a final technical datasheet.

STANDARDS

Compliance topics depend on market, system and project.

Public market references show that overseas aluminum window and door projects may ask about wind, water, acoustic, thermal, coating, security, impact and curtain-wall testing. YULUX should present this as coordination capability unless a YULUX-owned report or certificate is confirmed.

Wind / water / structure	AS2047, AS/NZS 4420.1, ASTM E283/E330/E331 appear in public project references.
Thermal / energy	NFRC and other energy-rating systems are market-specific and product-specific.
Acoustic	AS 1191, AS/NZS ISO 717.1, ASTM E90 and STC/Rw reports are configuration-based.
Coating / finish	AAMA 2603/2604/2605 and QUALICOAT references inform finish discussions.
Security / impact	PAS 24, Miami-Dade NOA and Florida approvals are not interchangeable credentials.

How to use this

- Use standards as discussion topics.
- Confirm by exact product system.
- Use YULUX-owned proof only for claims.

Do not state YULUX is certified to any specific standard unless an exact YULUX certificate or test report is provided and reviewed.

NEXT STEP

Send the project information. We will help check the configuration.

- Window and door schedule or CAD drawings
- Opening sizes and quantities
- Project country, city and building type
- Glass, color, hardware and screen preference
- Photos or reference style if available
- Target delivery time and trade term preference
