Open corner solution, pocket solution
SPECIAL SOLUTIONS

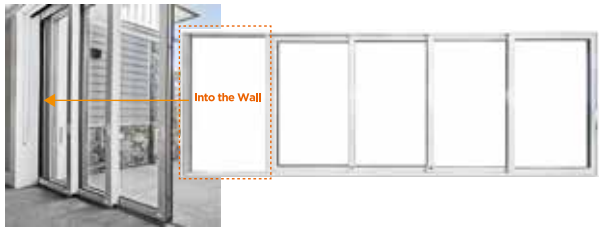

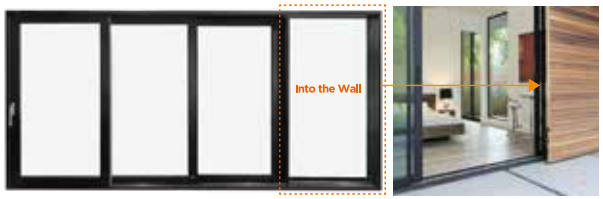

OPEN CORNER

An open corner makes it possible to open up the room without any visiblecorner elements. In combination with low or zero threshold solutions, this takes away allboundaries between inside and outside. The DW160S lift & slide cornersolutions allow to open-both in and outward corners, without compromising the systems'known benefits of comfort and Insulation.

POCKET SOLUTION

With a pocket solution up to 6 vents can be glided into the wall when opened, then no visible elements remain and the maximum opening potential can be used. The pocketsolution is available for the lift & slide systems in duo tracks, 3-track, or up to 6-track (multiple-track) compositions.

The slim frame solution has a meeting section of only 4 (1 5/8") wide,which fits perfectly with 100% today's arc tural trends.

To further enhance accessibility and comfort, YULUX offers can be applied to certain configurations, including 2-track to 6-track solutions. With automatic functionality, you can effortlessly operate your doors with the touch of a button, adding a new level of convenience and sophistication to your space.

Multi-Track Options

The 2-track option seamlessly integrates 2 glazed opening vents, creating an aesthetically pleasing lift sliding door with a uniform appearance. Both vents can function as sliding elements, offering users maximum flexibility and control.

The 3-track configuration introduces an additional track in the outer frame, enabling the installation of a third opening panel. This innovative solution allows users to open up 2 sliding panels, resulting in a significantly larger opening that is double in size.

For even greater flexibility, our lift and slide variant offers a unique multiple-track principle. This remarkable feature allows for the expansion of elements up to six tracks, facilitating creative designs with super large openings. With this multiple-track solution, you have the freedom to customize your space and achieve stunning architectural designs.
